Workflow Form

1. **Students**: Send the completed and signed form to studiendekan@cs.uni-goettingen.de.

2. Processing by the Dean's Office: Once the examination board has confirmed the assignment of the topic, the thesis is registered in FlexNow by the Examination Office. The thesis is then assigned to a supervisor by the Dean's Office.

3. Students and reviewers receive an automatically generated email that includes the submission date of the thesis. This email serves as official confirmation that the thesis has been successfully registered.

Approval of the topic by the examination committee

Date   Signature

1Please note: Both reviewers must be authorized to examine for the respective degree program. The application for an examination correction can be found here. The official regulations for examination authorizations in our degree programs can be found here.

Granting of Rights of Use for Theses

The author grants the Institute of Computer Science a permanent, simple right of use to use the protected object in the following manner:

- the right to exploit the work, i.e. in particular to distribute it to students at Georg August University Göttingen for study purposes

She / he further assures that her / his work and its publication do not infringe on the rights of third parties. As a precautionary measure, the author indemnifies the Institute of Computer Science against any claims by third parties in this regard.

Granting the simple right of use means that you can publish your work elsewhere online (e.g., on your own website) or print it without having to ask the Institute of Computer Science for permission. You can also grant a third party the right to publish your work elsewhere online or in print. However, you can no longer grant a third party exclusive rights of use.
